Ventilation requirements for built-in minibars: A channel for air circulation is imperative for ventilation and operation. A minimum open area of 200 cm² is required for proper ventilation. Please refer to the *Minibar Case Good Specifications Manual* for all details.

Specifications may change without notice due to continuous product development.

*Average energy consumption per 24 hours, at 25°C (77°F) ambient temperature and 7°C (44.6°F) cooling temperature, in compliance with EN ISO 7371.

**Add 23 mm to the depth of the PRIMO 42D for handle.
